

I do NOT agree with the use of the "broadcast flag" for digitalbroadcast copy protection.

This will be used by broadcasters and content owners to destroy my fair use rights. While I sympathize with the broadcasters and content owners on their need to protect their content, they should not be able to decide when I can record and watch their content. If their content is delivered to my home, I should be able to record it and play it later for my own personal home use, without any restrictions.

This time-shifting right was secured for me by previous court rulings. I have no intention of stealing or duplicating their content. I just want to be able to watch it on my own time schedule.

Thank You
Troy Wehrle
